

VIPUL RAJ JHA

Strategic Technical Delivery | AI Data Quality & LLM Coding-Data Programs

+91-9560734386 | vipul21435@iiitd.ac.in | Delhi, India | LinkedIn | GitHub | LeetCode | Codeforces

SUMMARY

AI data quality and technical delivery professional with hands-on experience in review and QA workflows for LLM coding-data programs at Scale AI (Outlier). Managed the most recent project (Meter Pavilion) end to end as Squad Lead: scoping tasks, designing evaluation rubrics and technical assessments, building review workflows, and driving execution with a distributed technical squad that delivered 11,000+ hours of task work at a 3.9/5 average quality rating; personally hold a 4.3/5 score across 51 internal quality reviews. Strong engineering foundation (C++, Python, 1000+ DSA problems solved, Codeforces Specialist) with QA automation and CI/CD experience.

EXPERIENCE

AI Engineer / LLM Trainer - Scale AI (Outlier Platform)

Aug 2025 - Present

- Served as Squad Lead on the most recent project, Meter Pavilion, managing a distributed squad of technical contributors end to end: owned task allocation and review workflows, defined quality bars, and mentored contributors through corrective feedback; squad delivered 11,000+ hours of completed task work at a 3.9/5 average quality rating.
- Serve as lead reviewer on more than 50% of assigned projects, including Eunomia (multi-model coding and reasoning evaluation), enforcing evaluation rubrics and per-task quality bars; promoted to L10, the platform's senior reviewer tier, for consistent quality judgment.
- Earned the Oracle designation, the platform's top-contributor tier, by maintaining a 4.3/5 personal score across 51 internal quality reviews.
- Develop and curate LLM evaluation datasets for reasoning, safety, and instruction-following tasks; build RLHF and SFT feedback loops that measurably improve baseline model performance.
- Build Python validation pipelines (NLP-based) for automated data quality assurance and model output monitoring; use review metrics to track delivery quality, accuracy, and turnaround time across large-scale dataset construction.
- Fine-tune transformer models using LoRA and PEFT; implement context-aware evaluation workflows using Model Context Protocol (MCP) and RAG pipelines.

Automation & AI Intern - Zinnia Digital Services LLP

Apr 2025 - Jun 2025

- Automated end-to-end QA test scripts for Farmers Insurance client applications (Zinnia Live, Zahara) using Python and Selenium; completed two major CI/CD pipeline phases, reducing regression testing time by ~65% and cutting manual estimation effort by 3+ hours per release cycle.
- Collaborated with cross-functional engineering teams to maintain and extend testing tooling across multiple application releases, ensuring continuous integration quality and REST API contract validation at scale.

Research Intern - HCD Lab, IIIT Delhi x Ariel University, Israel [Publication]

Jul 2023 - May 2024

- Engineered AI-assisted design evaluation modules in Java (Linkoder) to analyse the impact of design methods on ideation and cost across 150+ structured design evaluations, streamlining cross-institutional research workflows; co-authored a peer-reviewed publication on AI-driven design methodologies.

VR Developer - ETiDM Lab, IIIT Delhi [GitHub]

Jan 2024 - Aug 2024

- Built a Blender-inspired 3D modelling application in Unity (C#, HTML, CSS, JS) applying OOP and system design principles; delivered 3-axis manipulation and visualisation tools validated through user testing.

TECHNICAL SKILLS

AI Data Quality & Evaluation: LLM Evaluation & Rubric Design, Technical Assessment Design, Review & QA Workflow Design, Model Output Validation, Dataset Construction, RLHF, SFT, Prompt Engineering

AI & Machine Learning: Fine-Tuning (LoRA, PEFT), Transformer Models, NLP, RAG, Embeddings & Vector Databases (FAISS, Pinecone), AI Agents & Agentic Workflows, Model Context Protocol (MCP), Classical ML (Regression, Classification, Clustering)

ML Frameworks & Libraries: PyTorch, TensorFlow, Hugging Face Transformers, scikit-learn, NumPy, Pandas, OpenAI API

Delivery & Leadership: Distributed Team Coordination, Review & Feedback Cycles, Metrics-Driven Delivery (quality, accuracy, turnaround time), QA Automation, CI/CD, Agile/Scrum, Debugging, Test Design

Languages: C++, Python (Selenium, BeautifulSoup), Java, JavaScript, C, SQL

Backend / Cloud / Tools: AWS, Azure, MLOps & Model Deployment, MySQL, Node.js, React.js, REST APIs, Git, PubMed API, Linux

CS Fundamentals: Data Structures & Algorithms, OOP, System Design, Design Patterns, Architectural Patterns

MAJOR PROJECTS

Web Scraping & LLM Analysis Pipeline [GitHub]

Sep 2024 - Jun 2026

Python, BeautifulSoup, Selenium, PubMed API, Pandas, REST APIs, LLM, NLP

- Extracted 10,000+ abstracts from Google Scholar and PubMed via REST API integration; applied LLM and NLP processing pipelines to accelerate literature analysis for drug-discovery and materials science research.
- Built a modular data pipeline with automated deduplication, preprocessing, and query-driven filtering to support downstream ML/DL model evaluation and fine-tuning workflows.

CourseBot360 - AI Chatbot [GitHub]

Jan 2024 - Apr 2024

HTML/CSS/JS, OpenAI REST API, Node.js, Prompt Engineering, System Design

- Developed and deployed an AI-powered course-selection chatbot using the OpenAI REST API with robust backend data handling; achieved 6x improvement in course search efficiency and reduced manual queries by 70%.

Cab Booking System [GitHub]

Jan 2023 - Apr 2023

MySQL, PHP, JavaScript, REST APIs, OOP, SQL

- Built a full-stack booking system with REST API endpoints and an admin dashboard supporting 100+ users, 50+ drivers, and 1,000+ transactions via optimised SQL data pipelines and OOP design.

EDUCATION

B.Tech Computer Science & Social Sciences - IIIT Delhi

Aug 2021 - May 2025

Dean's List Awardee (2023-24) | Cleared JEE Advanced (2021) | CBSE Grade 12: 89.80%

ACHIEVEMENTS & AWARDS

- Competitive Programming:** Codeforces Specialist (rating 1485); World Rank 979 in Codeforces Round 994 (35,000+ participants); top 4% on LeetCode by problems solved; 1000+ DSA problems solved across platforms.
- Industry Recognition:** Top 4% Young Turks ranking by Naukri.com, recognising emerging engineering talent.
- Certifications:** Certified in Ethical Hacking, with hands-on knowledge of cybersecurity, penetration testing, and secure software development practices.
- Mentorship & Leadership:** Mentored 100+ underprivileged students for JEE/NEET preparation, building structured coaching materials and running regular doubt-clearing sessions.
